

Vagrus – The Riven Realms Releases Its Second Major Content DLC

To enrich the already vast realm of the Riven Realms, and to further add to the victory paths already available to players, **Lost Pilgrims Studio** is thrilled to announce its second free, major content DLC – ‘**Seekers of Knowledge**’. The DLC itself unlocks a variety of extensive questlines and introduces the Sunken Tower, a massive new dungeon and the focal point of the release’s new stories.

Once known as the Tower of Akarius, the Sunken Tower was home to a host of scholarly Elves, Humans, and Dwarves – all of whom worked tirelessly toward the unified pursuit of knowledge. Millennia have passed since that time, however, and thanks to the apocalyptic event known as the Calamity, the Tower now wrestles with a different fate. A fate where its once proud denizens languish in the recesses of its hallowed halls, seeking respite, unable to escape the terrible curse that has beset the place.

Along with the Sunken Tower, this DLC introduces a variety of new enemies, NPCs, quests, and the new Knowledge Ambition questline, which tasks the player with amassing and uncovering all kinds of knowledge to achieve victory in the allotted time limit. The quest itself encompasses one of the largest stories yet to be told in the Riven Realms – a story that will inevitably see vagri descend into the darkest depths of forbidden knowledge and madness-inducing truths that are best left forgotten.

The Sunken Tower and its associated Knowledge Ambition questline are only available to those who already have the base game, as this DLC is the second in a series of free downloadable content forthcoming for *Vagrus* from Lost Pilgrims Studio.
